To Whom It May Concern

Subject: Recommendation

It gives me great pleasure to write this letter of recommendation for Saladin Kedir up on his request. Having known him for more than two years as his school principal in Brightside International Academy, I feel honored to reflect my thoughts on his remarkable personality and potential.

To start with, Saladin has already been recognized as a hardworking and resourceful student in the academy. Above all, his creative manner in studying with his classmates and solving different problems cooperatively impresses me most. Regarding his academic performance in high school and preparatory level, he stood among the top fifteen scorers in the academy with high competition

In addition to his better academic performance, he has also highly participated in different co-curricular activities including science and technology and Information Communication Technology Clubs. With all this attributes, he has been recognized by the teachers and the school administration as well.

I am therefore confident to say that Saladin will be a great asset for any education institution and would like to recommend him with great pleasure. I would also like to thank in advance for any assistance to be rendered to him.

With Best Regards,
