Dear Admissions Committee,

It is my great pleasure to write this recommendation to Mahlet Zelalem who is the most outstanding student among learners in my language classes. It is appropriate to support Mahlets' application for the admission to your undergraduate program. Mahlet is deeply committed to learn English language in addition to Natural science and ambitious to achieve her dreams. Her success is not only in this school but also her achievement is well known in the city administration, too. In every exam she scored the highest. Mahlet is the most talented student I have ever known in my teaching carrier. Since I recognized her in this school, I have understood that she is highly eager to know, to learn more and to achieve her dreams.

Mahlet is a unique student who developed all rounded personality. She is extremely patient to do activities given by her teacher, to discuss challenging issues with classmates. I really appreciate her passion. Something that impressed me about her for the first time was the way she wrote her essay during the test. She has repeated described her dreams in her essay. In her essays, the techniques, vocabularies, punctuations, paragraph organizations were really amazing. It is possible to say that her writing techniques are beyond her age level and matured. In addition, her oral fluency during communication tasks makes her the most wonderful student.

Mahlet is a hardworking, strong, compassionate, patient, and intelligent student who is successful in everything she does. She is also a wonderful student who is able to plan and achieve her goals. Her desire to help her peers is admirable. As Students tell me that one day a week she gives tutorials to them. Not only in the class, but also she actively participated in different school clubs including Mathematics Club, Science and Technology Club, Tomorrow's Doctor's Club, Genders Equality Club and others as a co-curricular activities.

As a teacher, I really confirm that Mahlet is able to fit the criteria that your undergraduate program set. She told me that she intends to achieve her dreams by joining international universities. If she gets the opportunity of joining your program, she will be one of the most influential scientists in our planet. When we discussed her dreams, she convinced me that she will be able to discover something important for this world, and to achieve her great dreams. I am sure that she can fulfill her dreams with great determination and hard work. Please don't hesitate to contact me if you have any questions at: amaretamir655@gmail.com.

Yours sincerely,

Mr. Amare Tamir,

English Teacher,

Bole General Secondary School

Tamir
