REF.NO STEM/21/2015

To whom it may concern,

With great pleasure and eyes full of tears, I recommend the best student of the generation and the best person I have ever seen in my entire academic life for admission to your school. It is hard to overstate the meaningful contributions that Amdebirhan has made to our school. Throughout his high school career, Amdebirhan astounded both teachers and students by conducting extraordinary and amazing feats that most high school students would find impossible. I can honestly say that Amdebirhan makes our school a better place to learn, and our school won't be the same without him. Amdebirhan is a student with impressive academic credentials that go far beyond grades and test results. He has pursued extracurricular activities to an uncommon degree, making him the best scholar of his generation. He made a strong commitment to pursue what he loves with singular energy and discipline. Amdebirhan is a student who is going to accomplish world-changing things. He is a student who will start the next huge company and revolutionize the world. He will make a valuable contribution in college and beyond.

It is truly rare to find a student like Amdebirhan. His personality is what makes him the most unforgettable and memorable student. He is a very smart, kind, and funny student who truly loves his friends to an unusual degree. As long as I know He loves his friends more than anything in our school. He was always trying to make things better for them. He was willing to put in extra effort and time to make sure everyone was safe, happy, and comfortable. He truly cares about his school and his friends, which is why he always works hard, finds various types of clubs, and organizes terrific events. Amdebirhan is a precious asset for his school and a ray of hope for his country.

I want to explain how Amdebirhan make our school a better place and how he will make our world a better world in near future.

Amdebirhan is the only brilliant Student Who Conducted Research with College Professor at Bahir Dar University and received a merit Award at a young age. He is genuinely enthusiastic about his education, which is why he has travelled this far to quench his thirst for knowledge. He brings numerous awards and recognition to our school. He has won the National Science Fair twice, and our school has received recognition from the Ministry of Education, As a result of him.

He brought not only awards and recognitions but also unique events that surprised the entire community. He organized and hosted a successful Hackathon on his own. This is a trulley massive thing to do as a Student.

Amdebirhan worked hard to be the best student, but so did everyone else. What distinguishes him is that he never been in competition for grades. He goes out of his way to help his peers succeed alongside him rather than simply pushing himself to the limit. He always shows a way to his friends. In his Junior year, he became an Ambassador and represented his country Internationally at International Model United Nations. But what impressed me is the next thing he did after he came. He founded a Model United Nation Club and shared his experiences, and now among the members, there are two international ambassadors. This is an indication of a pure heart and exceptional leadership. Amdebirhna is a student who exemplifies candor, humility, and Good friend.

When it comes to academic, Amdebirhan is still in the top 1% of students not in our School but Nationally. Our school does not offer class ranks but we select valedictorian and salutatorian every years and In our school, he is our Valedictorian. The amazing part of his high school journey is not that he is valedictorian or that he is in the top 1% of students list nationally but rather how he tried to make the most of the opportunities and resources available to him. He is a student who has made the most of his academic opportunities and beyond.

Amdebirhan's Curiosity is extra ordinary. He took an extremely high amount of course load and very rigorous courses. He even crosses the borders to quench his thirst for knowledge. Amdebirhan took advantage of Bahir Dar University's strong support for our school to conduct his research and engage in other academic pursuits. He used Bahir Dar University to maximize his academic and personal potential and stretch himself. The professors at Bahir Dar University genuinely love him for his personal and academic character, and he wisely uses his relationship with Professor's for his gains.

Beyond his Academic Excellence, Amdebirhan is a very kind and sincere friend that everyone desires, a humble and hardworking student that every teacher longs to have, an aspirational business partner that every entrepreneur needs, a boy that every parent desires, and a student that every school aspires to have. Amdebirhan is a very Friendly student who is almost everyone's friend. This is due to the fact that he has a sense of humor. Kevin Hart is the nickname given to him by his friends. After his 20 minutes of stand-up comedy in his sophomore year, the student gives him this nickname. He was able to keep us laughing nonstop for 20 minutes. He is gifted with the ability to tell funny stories and to know when to stop having fun. His friends are correct in calling him Kevin, but Amdebirhan is Young Sheldon with Kevin's humor.

Amedbirhan is a self-starter. He is a kind of person who begins works or projects by his own initiative, without needing to be told or encouraged to do so. He proves this through his extracurricular activities. He has excellent time management abilities. He took many course loads and excelled in all of them while still having time to hang out with his friends and lead the soccer team as a Capitan. He is a Warrior in the classroom and a great goal keepr on the field.

Amdebirhan is a lifelong learner and he truly loves learning for the sake of learning. He has a solid ability to work with his peers to create something novel. He can make a friend in an instant and complete some projects. He is receptive to new people and ideas. Amdebirhan possesses the energy, power, skill, and commitment to accomplish great things. He will bring something significant to our world because he brings so much to our school. Amdebirhan is charismatic individual who is respected and liked by faculty and peers.

His Nationwide Red Cross task force group is one of the most memorable things he did for his country. He began by forming a local task force of only 50 people. Because of his hard work and dedication, he now leads a National Taskforce of over 10,000 students. It is a large group to lead, but Amdebirhan's leadership abilities are world-class. He did not fear leading thousands of people, but rather used it wisely. The northern part of Ethiopia is in the grip of civil war, so he concentrated his efforts there. He assists members in raising basic necessities, educational materials, and first aid medical kits for young civil war victims.

Overall, Amdebirhan exhibits the qualities of a leader as well as a great scientist who has had ample research experience and excels academically in challenging, college level courses. He is an intelligent and grounded individual who challenges himself and actively seeks new opportunities and experiences. He has the determination, maturity, and intelligence to succeed in any endeavor and always maintains a positive attitude.

His academic and personal achievements show that he is committed to his education and will work hard to achieve his goals. He exudes confidence and has a vivid, outgoing, and friendly personality that allows him to get along with others very well in any setting. He is a highly motivated individual with a thirst for knowledge. Amdebirhan would truly be a superior addition to the student body , to the research group , and to the soccer team.

Amdebirhan has my most enthusiastic recommendation. I truly believe that he Will significantly impact both the world and your school. He made our school proud by assisting so many of our students and even helped us win an honor from the Ministry of Education. He will no doubt be an asset to your school as well. If he makes this much noise as a high school student, just imagine what he will do in college. I wish him all the best and a great college where he can use his potential without the limitation of resources and supports. Please don't hesitate to be in touch if you have further questions or require additional information.
